DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of group I, claims 1-33 in Paper No. 11 is acknowledged. The traversal is on the ground(s) that "Group I and Group II are sufficiently related to one another such that it would be not only more efficient but also more cost effective to prosecute all claims in a single application. Still further, examining all claims in a single application would not be an undue burden on the Examiner". This is not found persuasive because there is no reason provided to show why examining all claims in a single application would not be an undue burden on the Examiner and would be more efficient. The groups I and II direct to two different class and sub-class which require the knowledge about two different arts to exam all claims. Therefore, the restriction is proper.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 is identical with claim 7

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-4, 11-12, 17-18 and 21-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Holtzman et al (US 2003/0028699) in view of Ferrant (6,563,749).

Holtzman et al (Fig.1 and 2) disclose a memory system (100) that couples to a host (160) comprising a plurality of storage elements (111) and a controller (131). Holtzman et al fails to disclose or suggest that the plurality of storage elements having a first portion with low density and a second portion with high density. However, Ferrent (Fig.5) discloses a memory with a first portion (SMC memory portion) with low density (SRAM) and a second portion (MC memory portion) with high density (DRAM) to increase the production yield. Thus, it would have been obvious to one of ordinary skill in the art at the time this invention was made to modify Holtzman et al by using the Ferrant memory storage element in Holtzman et al's memory system to increase the production yield.

Art Unit: 2824

Allowable Subject Matter

3. Claims 5-10, 13-16 and 19-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

- 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 5. Nishizawa et al (US 2001/000950) disclose a memory card with different kind of memory.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vu A. Le whose telephone number is (571)272-1871. The examiner can normally be reached on M-F (7:00-3:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Elms can be reached on (571)-272-1869. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
